PROJECTS

MoodSync – AI-based Health Tracking App
Role: Founder & Developer
Developed an innovative mobile application integrating emotional and physical health tracking. The app uses AI to provide personalized wellness insights and recommendations.

Nike Website Clone
Role: Frontend Developer
Designed a responsive and interactive Nike shoes website using HTML, CSS, and JavaScript. Included animations, transitions, and advanced styling to mimic a professional brand website.

Netflix Clone
Role: Frontend Developer
Built a fully responsive Netflix clone using HTML, CSS, and JavaScript. Implemented sections like trending, originals, and a dynamic user interface inspired by the real platform
